

PSMA Energy Storage Committee Meeting Minutes 20 Apr 2022

Attendees – John Horzepa, Joe Horzepa, Ada Cheng, Mike Hayes, Eric Swenson, Eric Schneider

Discussion -

Ada C - Battery State Of Health:

Ada suggested a potential guest speaker or committee participant from Venable Instruments,

Don Woodard. The company specializes in battery state of health calculations. Ada will contact Don to gauge interest.

Committee and Member Activities Discussion:

The committee can help to enable different activities within PSMA for the committee members. This includes:

- APEC Industry Session Topics;
- Educational Seminars;
- Technology Roadmapping;
- Special technology requirements that are hard to tackle or are emerging;
- Special Guest Speakers that wish to communicate technology or market advances in energy storage.

There were some recommendations for energy storage topics that could be addressed in seminars or Industry Sessions, including:

- Energy Storage for Data Centers;
- Localized energy storage at end nodes of the Internet of Things (IoT) and sensors on vehicles;

For the guest speaker topic, it was suggested that we contact Ronald DeGraaf of Nawa Technologies. The company has new energy storage technology that would be interesting to committee members. Eric Schneider will approach Ronald with Lisa Horzepa's help to find out his interest level for being a speaker and/or being on the committee.
